

## S2E3 - Contenances

1. Alice a rempli son bol d'eau et a ensuite versé l'eau dans le verre doseur.

Quelle est la contenance du bol d'Alice ?

2. Voici le verre doseur de Louis. En quelle unité sont les nombres 10, 20, 30, 40, etc. ? \_\_\_\_\_

2. Complète :

$$1 \text{ L} = \underline{\quad} \text{ cL} ; \quad 35 \text{ dL} = \underline{\quad} \text{ cL} ; \quad 300 \text{ cL} = \underline{\quad} \text{ L} ;$$

$$4 \text{ L} = \underline{\quad} \text{ mL} ; \quad 20 \text{ cL} = \underline{\quad} \text{ dL} ; \quad 450 \text{ mL} = \underline{\quad} \text{ cL} ;$$

$$3 \text{ L} = \underline{\quad} \text{ dL} ; \quad 1 \text{ mL} = \underline{\quad} \text{ dL} . \quad 17 \text{ cL} = \underline{\quad} \text{ mL} .$$

3. Complète les additions :

$$2 \text{ L} \quad \text{370 mL} + \quad 1 \text{ L} \quad \text{420 mL} = \underline{\quad} + \underline{\quad} \text{ L} \quad \underline{\quad} + \underline{\quad} \text{ mL} = \underline{\quad} \text{ L} \quad \underline{\quad} \text{ mL}$$

$$5 \text{ L} \quad \text{475 mL} + \quad 7 \text{ L} \quad \text{585 mL} = \underline{\quad} + \underline{\quad} \text{ L} \quad \underline{\quad} + \underline{\quad} \text{ mL} = \underline{\quad} \text{ L} \quad \underline{\quad} \text{ mL}$$

$$3 \text{ L} \quad \text{58 cL} + \quad 9 \text{ L} \quad \text{65 cL} = \underline{\quad} + \underline{\quad} \text{ L} \quad \underline{\quad} + \underline{\quad} \text{ cL} = \underline{\quad} \text{ L} \quad \underline{\quad} \text{ cL}$$

$$12 \text{ L} \quad \text{29 cL} + \quad 24 \text{ L} \quad \text{755 mL} = \underline{\quad} + \underline{\quad} \text{ L} \quad \underline{\quad} + \underline{\quad} \text{ mL} = \underline{\quad} \text{ L} \quad \underline{\quad} \text{ mL}$$
